Election/Restrictions

1. The Restriction to one of the following inventions is required under 35 U.S.C.

121:

- I. Claims 1-14 drawn to a cell culture system and method of producing same, classified in class 435 and subclasses 325, 347, and 368 for example.
- II. Claims 15-19 drawn to a method of identifying a bioactive agent using a cell culture system, classified in class 435 and subclasses 4 and 375 for example.
- III. Claims 20-21 drawn to a method for treating a retinal disease by introducing retinal stem cells into retinal tissue of a subject, classified in class 424 and subclasses 520 and 571 for example.

2. Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product. See MPEP § 806.05(h). In the instant case, Invention I can be used in the process of Invention III.

3. Inventions I and III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different

Art Unit: 1649

process of using that product. See MPEP § 806.05(h). In the instant case, Invention I can be used in the process of Invention II.

4. Inventions II and III are distinct, each from the other because of the following reasons: Although there are no provisions under the section for "Related Inventions" in M.P.E.P. 806.05 for "inventive groups that are directed to different processes; restriction is deemed to be proper because these processes appear to constitute patentably distinct inventions for the following reasons: Inventions II and III are directed to processes that are distinguished, one from the other, by different and distinct process steps and the purpose or desired result of the process of Invention II is different and distinct from the purpose or desired result of Invention III.

5. Because these inventions are distinct for the reasons given above, and because the search and examination of these groups are different because they involve separate searches in both the patent and non-patent literature, restriction for examination purposes as indicated is proper because the search and examination of these groups is different and would pose an undue burden to the examiner.

6. A telephone call was made to Mae Joanne Rosok on 6/8/06 to request an oral election to the above restriction requirement, but did not result in an election being made.

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

Art Unit: 1649

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.1741).

8. The examiner has required restriction between product and process claims.

Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder.

All claims directed to a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.** Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.
